BEST MANAGEMENT PRACTICES FOR STORMWATER DISCHARGES

SEC 17.01 GENERAL

Projects within Placer County shall be designed utilizing Best Management Practices (BMPs) for reducing pollutants in storm water discharges. Both source control BMPs and treatment control BMPs shall be incorporated into the project designs.

Designs shall follow criteria outlined in current design documents such as the California Stormwater Best Management Practice Handbook prepared by the Stormwater Quality Task Force dated March, 1993 or other design criteria as approved by the Engineer, and shall be in compliance with National Pollutant Discharge Elimination System (NPDES) requirements, as applicable.

All applicable BMPs designs shall be included as part of all required improvement plans. Applicable locations and details shall be included on the plans. Supporting design calculations and design criteria shall be submitted for review and approval by the Engineer.
