

4

MITIGATION MONITORING AND REPORTING PLAN

INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires all state and local agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a Mitigated Negative Declaration (MND) or specified environmental findings related to Environmental Impact Reports (EIRs).

The following is the Mitigation Monitoring and Reporting Plan (MMRP) for the Bohemia Retail project. The intent of the MMRP is to prescribe and enforce a means for properly and successfully implementing the mitigation measures as identified within the EIR for this project. Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this MMRP shall be funded by the applicant.

MITIGATION MONITORING AND REPORTING PLAN

The MMRP contained herein is intended to satisfy the requirements of CEQA as they relate to the EIR for the Bohemia Retail project prepared by Placer County. This MMRP is intended to be used by County staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the EIR prepared for the proposed project.

The Bohemia Retail EIR presents a detailed set of mitigation measures that will be implemented throughout the lifetime of the project. Mitigation is defined by CEQA as a measure which:

- Avoids the impact altogether by not taking a certain action or parts of an action;
- Minimizes impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifies the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reduces or eliminates the impact over time by preservation and maintenance operations during the life of the project; or
- Compensates for the impact by replacing or providing substitute resources or environments.

The intent of the MMRP is to ensure the effective implementation and enforcement of adopted mitigation measures and permit conditions. The MMRP will provide for monitoring of construction activities as necessary and in-the-field identification and resolution of environmental concerns.

Monitoring and documenting the implementation of mitigation measures will be coordinated by Placer County. The table below identifies the mitigation measure, the monitoring action for the mitigation measure, the responsible party for the monitoring action, and timing of the monitoring action. The applicant will be responsible for fully understanding and effectively implementing the mitigation measures contained within the MMRP. Placer County will be responsible for ensuring compliance.

During construction of the project, the County will assign an inspector who will be responsible for field monitoring of mitigation measure compliance. The inspector will report to the County Planning Department and will be thoroughly familiar with permit conditions and the MMRP. In addition, the inspector will be familiar with construction contract requirements, construction schedules, standard construction practices, and mitigation techniques. In order to track the status of mitigation measure implementation, field-monitoring activities will be documented on compliance monitoring report worksheets. The time commitment of the inspector will vary depending on the intensity and location of construction. Aided by the table, the inspector will be responsible for the following activities:

- On-site, day-to-day monitoring of construction activities;
- Reviewing construction plans and equipment staging/access plans to ensure conformance with adopted mitigation measures;
- Ensuring contractor knowledge of and compliance with the MMRP;
- Verifying the accuracy and adequacy of contract wording;
- Having the authority to require correction of activities that violate mitigation measures, securing compliance with the MMRP;
- Acting in the role of contact for property owners or any other affected persons who wish to register observations of violations of project permit conditions or mitigation. Upon receiving any complaints, the inspector shall immediately contact the construction representative. The inspector shall be responsible for verifying any such observations and for developing any necessary corrective actions in consultation with the construction representative and Placer County;
- Obtaining assistance as necessary from technical experts in order to develop site-specific procedures for implementing the mitigation measures; and
- Maintaining a log of all significant interactions, violations of permit conditions or mitigation measures, and necessary corrective measures.

The following MMRP indicates the mitigation measure number, the impact the measure is designed to address, the mitigation, the monitoring agency, the implementation schedule, and an area for sign-off indicating compliance.

MITIGATION MONITORING AND REPORTING PLAN BOHEMIA RETAIL					
Impact Number	Impact	Mitigation Measure	Monitoring Agency	Implementation Schedule	Sign-off
5. Biological Resources					
5-1	Impacts to special-status plant species.	<p>5-1 <i>Prior to the issuance of a grading permit, the project applicant shall be responsible for retaining a qualified biologist to conduct a focused spring bloom survey to determine the presence or absence of Brandegee’s clarkia (Clarkia biloba spp. Brandegeae). The survey shall be conducted by a qualified biologist during the identification periods for the Brandegee’s clarkia. If the species is not found to be present during the focused bloom survey, then no further action is required.</i></p> <p><i>However, if Brandegee’s clarkia is found, a mitigation plan conceived from consultation with the California Department of Fish & Game shall be prepared and submitted to the County. The plan shall detail the various mitigation approaches to ensure no net loss of the special-status plant. Mitigation could include, but would not be limited to, avoidance of the plant species, salvage of plant materials where possible, acquisition of credits at an approved mitigation bank, or acquisition and preservation of property that supports the plant species.</i></p>	<p>County Planning Department</p> <p>California Department of Fish and Game (CDFG)</p>	Prior to the issuance of a grading permit	
5-2	Impacts to raptors and migratory bird species.	<p>5-2 <i>If project development activities occur during the breeding season for any of these species, a pre-construction survey shall be conducted by a qualified biologist no more than 30 days prior to any ground disturbance activity. The CDFG considers the breeding season of protected bird species to be January 1 to August 31 of any given year.</i></p> <p><i>The project applicant shall be responsible to coordinate with the CDFG for the pre-construction survey(s) and implementing any measures required to avoid disturbance to the Cooper’s hawk, red-tailed hawk, red-shouldered hawk, white-tailed kite, American kestrel, golden eagle, and other “raptor” species, as well as the purple martin, horned lark, and yellow warbler. If any active nests or burrows of such species are found to be on-site, construction activities shall not occur within 500 feet</i></p>	<p>County Planning Department</p> <p>CDFG</p>	Pre-construction survey no more than 30 days prior to any ground disturbance activities, if project development activities occur during the breeding season

		<i>of the nest until the young have fledged. If determined by a qualified biologist, other restrictions may be imposed on construction activities in the vicinity of any active nest(s). If construction activities are scheduled outside of the breeding period, then a pre-construction survey is not required.</i>			
5-3	Impacts to western burrowing owl.	<p>5-3(a) <i>Prior to issuance of a grading permit, pre-construction burrowing owl surveys shall be conducted by a qualified biologist, within a 30 day period, preceding the initiation of construction activities on the project site. The pre-construction burrowing owl survey shall be conducted within 250 feet of the project site boundary. Presence or signs of burrowing owls and all potentially occupied burrows shall be recorded and monitored according to CDFG and California Burrowing Owl Consortium guidelines. If burrowing owls are not detected by sign or direct observation, further mitigation is not necessary. If burrowing owls are detected, the project applicant shall implement Mitigation Measure 5-3(b).</i></p> <p>5-3(b) <i>Prior to initiation of any construction activities, during the non-breeding season (September 1 through January 31), a non-disturbance buffer of 160 feet, and during the nesting season (February 1 to August 31), a non-disturbance buffer of 250-feet shall be established around each burrow with an active nest until the young have fledged and are able to exit the burrow, as determined by a qualified biologist. In the case of occupied burrows without active nesting, active burrows after the young have fledged, or if development commences after the breeding season, passive relocation, which involves installing a one-way door at the burrow entrance to encourage the owls to move from the occupied burrow of the</i></p>	<p>County Planning Department CDFG</p> <p>County Planning Department CDFG</p>	<p>Prior to the issuance of a grading permit, pre-construction burrowing owl surveys shall be conducted by a qualified biologist, within a 30 day period, preceding the initiation of construction activities on the project site</p> <p>Prior to initiation of any construction activities, during the non-breeding season (September 1 through January 31), and during the nesting</p>

		<i>owls, shall be performed. The CDFG shall be consulted for current guidelines and methods for passive relocation of any owls found on the site.</i>		season (February 1 to August 31), a non-disturbance buffer of 250-feet shall be established around each burrow with an active nest until the young have fledged and are able to exist the burrow, as determined by a qualified biologist	
5-4	Impacts to special-status amphibian and reptile species.	<i>5-4 The project applicant shall be responsible for retaining a qualified biologist to conduct focused surveys for the western pond turtle and the California horned lizard species prior to the development of the proposed project. The focused surveys shall be conducted during the respective breeding season for each species. If either species is found to be present on the project site, the project applicant shall be responsible to notify and coordinate with the CDFG for expert advice and regulatory guidance for further action.</i>	County Planning Department CDFG	Prior to development of the proposed project	
5-5	Impacts to protected trees.	<i>5-5 Prior to approval of the Improvement Plans, the applicant shall submit to the Placer County Tree Preservation Fund payment in the amount of \$65,180 for impacts to oak woodlands. If changes in the project are required during the Improvement Plan process, this figure may be altered provided that it is consistent with County policy. This payment must be received prior to any site disturbance.</i>	County Planning Department	Prior to approval of the Improvement Plans	

MITIGATION MONITORING AND REPORTING PLAN BOHEMIA RETAIL					
Impact Number	Impact	Mitigation Measure	Monitoring Agency	Implementation Schedule	Sign-off
5-6	Impacts to jurisdictional waters of the United States and waters of the State.	5-6(a) <i>To the extent feasible, the project applicant shall be responsible for the preservation of on-site water resources. If on-site preservation is not possible, the project applicant shall be responsible to coordinate with the USACE for an in-lieu fee program, which may include, but not be limited to, a local resource conservation bank, to offset the 0.05 acres of seasonal wetland (jurisdictional Waters of the U.S.) from project implementation. The required ratio for restoration of impacts to the 0.05 acres of seasonal wetland shall be determined by the resource agencies as part of the permitting process.</i>	County Planning Department United States Army Corps of Engineers (USACE)	Prior to site disturbance	
		5-6(b) <i>The applicant shall apply for a USACE Nationwide 39 Permit. If granted, the project applicant shall be responsible to ensure that all development activities adhere to the permit terms and requirements.</i>	County Planning Department USACE	Prior to site disturbance	
		5-6(c) <i>Subsequently, the project applicant shall also apply for a USACE pre-construction notification. If granted, the project applicant shall be responsible to ensure that all development activities adhere to the permit terms and requirements.</i>	County Planning Department USACE	Prior to site disturbance	
6. Cultural Resources					
6-2	Disturbance or destruction of previously unknown archaeological and paleontological resources on the	6-2(a) <i>During ground disturbance activities, if any earth-moving activities uncover any concentrations of stone, bone or shellfish, any artifacts of these materials, or any evidence of fire (ash, charcoal, fire altered rock, or earth), work shall be halted in the immediate area of the find and shall not be resumed until after a qualified archaeologist, in coordination with the County Planning Department, has inspected and evaluated the deposit and determined the appropriate means of curation.</i>	County Planning Department	During ground disturbance activities

	project site.	6-2(b) <i>During construction, if any bone is uncovered that appears to be human, the County Coroner shall be notified. Should human remains be found, all work shall be halted until final disposition by the Coroner. Should the remains be determined to be of Native American descent, the Native American Heritage Commission shall be contacted to identify most likely descendants.</i>	County Planning Department County Coroner Native American Heritage Commission (NAHC), if applicable	During construction	
8. Transportation and Circulation					
8-1	Impacts to traffic flow from construction traffic associated with development of the project site.	8-1 <i>Submit, for review and approval, a striping and signing plan with the project Improvement Plans. The plan shall include all on- and off-site traffic control devices and shall be reviewed by the County Traffic Engineer. A construction signing plan shall also be provided with the Improvement Plans for review and approval by the County Traffic Engineer.</i>	County Engineering and Surveying Department	In conjunction with submittal of Improvement Plans	
8-2	Impacts to intersections under the Existing Plus Project scenario.	<i>Bell Road/New Airport Drive (Intersection #13)</i> 8-2 <i>The project applicant shall be responsible for constructing the following improvements on northbound New Airport Drive:</i> <ul style="list-style-type: none"> • <i>Widen northbound New Airport Drive to provide an exclusive left-turn lane; and</i> • <i>Modify the signal to accommodate right-turn overlap phasing for northbound New Airport Road.</i> 	County Engineering and Surveying Department	Prior to approval of Improvement Plans

		10-3(b) <i>Loading and delivery activities shall be limited to the following hours: 6:00 AM to 12:00 AM. These requirements shall be clearly indicated in all contracts between the property owner and truck delivery vendors.</i>	County Planning Department	During operations	
11. Soils, Geology, and Seismicity					
11-2	Risks associated with erosion (loss of topsoil) and/or sedimentation.	11-2(a) <i>The applicant shall prepare and submit Improvement Plans, specifications and cost estimates (per the requirements of Section II of the Land Development Manual [LDM] that are in effect at the time of submittal) to the Engineering and Surveying Division (ESD) for review and approval. The plans shall show all conditions for the project as well as pertinent topographical features both on- and off-site. All existing and proposed utilities and easements, on-site and adjacent to and near the project, which may be affected by planned construction, shall be shown on the plans. All landscaping and irrigation facilities within the public right-of-way (or public easements), or landscaping within sight distance areas at intersections, shall be included in the Improvement Plans. The applicant shall pay plan check and inspection fees. (NOTE: Prior to plan approval, all applicable recording and reproduction cost shall be paid). The cost of the above-noted landscape and irrigation facilities shall be included in the estimates used to determine these fees. It is the applicant's responsibility to obtain all required agency signatures on the plans and to secure department approvals. If the Design/Site Review process and/or DRC review is required as a condition of approval for the project, said review process shall be completed prior to submittal of Improvement Plans. Record drawings shall be prepared and signed by a California Registered Civil Engineer at the applicant's expense and shall be submitted to the ESD prior to acceptance by the County of site improvements.</i>	County Engineering and Surveying Department	Prior to approval of Improvement Plans	
		11-2(b) <i>All proposed grading, drainage improvements, vegetation and tree removal shall be shown on the Improvement Plans and all work shall</i>			

MITIGATION MONITORING AND REPORTING PLAN BOHEMIA RETAIL					
Impact Number	Impact	Mitigation Measure	Monitoring Agency	Implementation Schedule	Sign-off
		<p><i>conform to provisions of the County Grading Ordinance (Ref. Article 15.48, Placer County Code) that are in effect at the time of submittal. No grading, clearing, or tree disturbance shall occur until the Improvement Plans are approved and all temporary construction fencing has been installed and inspected by a member of the Design Review Committee (DRC). All cut/fill slopes shall be at 2:1 (horizontal:vertical) unless a soils report supports a steeper slope and the Engineering and Surveying Department (ESD) concurs with said recommendation.</i></p> <p><i>The applicant shall revegetate all disturbed areas. Revegetation undertaken from April 1 to October 1 shall include regular watering to ensure adequate growth. A winterization plan shall be provided with project Improvement Plans. It is the applicant's responsibility to assure proper installation and maintenance of erosion control/winterization during project construction. Where soil stockpiling or borrow areas are to remain for more than one construction season, proper erosion control measures shall be applied as specified in the Improvement Plans/Grading Plans. Provide for erosion control where roadside drainage is off of the pavement, to the satisfaction of the ESD.</i></p> <p><i>The applicant shall submit to the ESD a letter of credit or cash deposit in the amount of 110 percent of an approved engineer's estimate for winterization and permanent erosion control work prior to Improvement Plan approval to guarantee protection against erosion and improper grading practices. Upon the County's acceptance of improvements, and satisfactory completion of a one-year maintenance period, unused portions of said deposit shall be refunded to the project applicant or authorized agent.</i></p> <p><i>If, at any time during construction, a field review by County personnel indicates a significant deviation from the proposed grading shown on the</i></p>	and Surveying Department	Plans

		<p><i>construction vehicles;</i></p> <ul style="list-style-type: none"> • <i>Provide the necessary facilities and infrastructure to encourage the use of low or zero-emission vehicles (e.g., electric vehicle charging facilities and conveniently located alternative fueling);</i> • <i>For commercial projects, provide adequate bicycle parking near building entrances to promote cyclist safety, security, and convenience. For large employers, provide facilities that encourage bicycle commuting, including, e.g., locked bicycle storage or covered or indoor bicycle parking;</i> • <i>Create bicycle lanes and walking paths directed to the location of schools, parks, and other destination points; and</i> • <i>Comply with the requirements within the Regulation for the Management of High Global Warming Potential Refrigerants for Stationary Sources in order to reduce the project's potential emissions of high GWP refrigerants.</i> 			
Initial Study					
VII-1, 2	Create a significant hazard to the public or the environment through the routine handling, transport, use, or disposal of hazardous or acutely hazardous materials?	<i>MM VII.1 As a condition of this project, the proponent shall submit to Environmental Health Services (EHS) a Hazardous Materials Business Plan (HMBP) detailing the quantity of fuels, oils, solvents, and batteries that will be kept on hand. The HMBP will include procedures for the cleanup of hazardous materials used in this business facility. The project proponent will submit with payment of all applicable fees to EHS complete construction plans of the underground storage tanks for the proposed gasoline station.</i>	Environmental Health Services	Prior to the approval of grading permits and When construction plans are submitted (See also Mitigation Measure 14-1(a))

				above)	
VII-8	Create any health hazard or potential health hazard?	<i>MM VII.2 In order to discourage the breeding of mosquitoes which have the potential to cause disease to humans and other hosts, the project proponent shall abide by the Placer Mosquito Abatement District (PMAD) construction guidelines for stormwater detention systems. PMAD shall review the improvement plans.</i>	County Planning Department PMAD	Prior to approval of Improvement Plans
