California County Data Web Resource Guide

Introduction

The California County Data Web Resource Guide is intended to assist persons and communities in obtaining county-level health data from the internet. The Guide is updated periodically as new data resources on the web are identified. The most recent version is available at:

http://www.placer.ca.gov/Departments/hhs/community_health/County%20Health%20Data.aspx

Methods

Web links were identified by Public Health Epidemiologists who routinely utilize health data on the internet to study the health of the population. All of the sites are government or government-related, and thus are considered reputable and reliable. While all of the hyperlinks have been tested, web addresses often change and thus this document may not always be up-to-date.

Updates

The Epidemiology program in the Community Health, Clinics, & Animal Services division is committed to keeping this resource as accurate and up-to-date as possible. As additional data resources are discovered, the Guide will be updated and posted on our website. We hope that the audience who utilizes this resource will notify us of any additional data resources on the internet that include California county-level health data.

Corrections or suggested additions to this document should be directed to Michael Romero, MPH, (530) 889-7153, mromero@placer.ca.gov.
