Introduction

As the Local Enforcement Agency (LEA), Environmental Health Services is certified by the California Integrated Waste Management Board to enforce state laws and regulations at solid waste facilities within its jurisdiction. The Western Regional Sanitary Landfill operates under a Solid Waste Facility Permit (SWFP), issued by the LEA. The Western Placer Waste Management Authority has filed a document with the LEA [Joint Technical Document (JTD)] which describes the design and operation of the facility.

Description of Project

The operator has proposed changes to the JTD in order to update outdated information and to reflect plans to store recycling bins at the active face of the landfill for salvaging of recyclable materials. No significant changes in site design or operation are proposed.

Local Enforcement Agency's Determination

The operator submitted an application for a 5-Year Permit Review, along with an updated JTD, to the LEA on 3-24-08. The LEA reviewed the application package and determined that the proposed changes are consistent with the existing California Environmental Quality Act (CEQA) documents. The LEA further determined that the proposed changes are consistent with the State Minimum Standards and do not conflict with the terms and conditions of the current Solid Waste Facilities Permit. As required by 27 CCR 21660.1, the LEA is distributing this notice for the purpose of noticing its acceptance of the revised JTD.
