BURN RECORDS

PROGRAM EVALUATION

100 GENERAL

PURPOSE: The purpose of this Rule is to provide a federally recognized procedure for quantifying and certifying rice straw burning emission reductions, and issuing the resulting Emission Reduction Credit (ERC) certificates.

This rule provides the only process by which ERC certificates issued for reductions in rice straw burning may be stored for later use to meet federal new source review offset requirements. Once issued in accordance with this rule, the procedures in Rule 504, EMISSION REDUCTION CREDITS shall be used as the administrative mechanism for sources to transfer ERCs to other sources for use as offsets.

- **APPLICABILITY:** The provisions of this Rule shall apply to any agricultural operation that grew rice and burned rice straw in the District during the baseline period.
- **DEFINITIONS:** Unless otherwise defined below, the terms used in this Rule are the same as defined in District Rule 504, EMISSION REDUCTION CREDITS, Rule 502, NEW SOURCE REVIEW, or Rule 501, GENERAL PERMIT REQUIREMENTS, in that order of priority.
 - **201 AGRICULTURAL BURNING:** Open outdoor fires used in the growing of crops. For the purpose of this Rule, agricultural burning is considered to be a source and such activity requires an agricultural burn permit.
 - **AGRICULTURAL BURN PERMIT:** A permit issued by the District, which is required in order to conduct an agricultural burn.
 - **AGRICULTURAL OPERATION:** Equipment used exclusively in the growing of agricultural crops or in the commercial raising of fowl or animals.
 - **AIR POLLUTION CONTROL OFFICER (APCO):** The Air Pollution Control Officer of the Placer County Air Pollution Control District (District), or his or her designee.
 - **APPLICANT:** For a new application, the owner (or his/her designee) of the parcel. For a recertification application, the current owner (or his/her designee) of an existing rice straw burning ERC.
 - **APPLICANT DESIGNEE:** The person, company, or entity submitting an application on behalf of the applicant. Such designee shall provide written authorization signed by the applicant to serve as the designee.
 - **BANKING:** The system of quantifying, certifying, recording, and storing ERCs for future use and transfer. This system shall be called the ERC Bank.
 - **208** BASELINE PERIOD: Calendar years 1988 through 1992.
 - **CERTIFIED:** ERCs which have been evaluated under the requirements of this Rule and other applicable District, State, and Federal Rules and Regulations and which have been granted by the APCO.
 - 210 EMISSION REDUCTION CREDITS (ERCs): Reductions of actual emissions that are registered with the District in accordance with the requirements of Rule 504, EMISSION REDUCTION CREDITS or Rule 506, BIOMASS EMISSION REDUCTION CREDITS AND BANKING.
 - 211 HISTORIC BURN FRACTION (HBF): The amount of rice (as a percentage of the amount planted) which was burned during the baseline period, equal to 100%.

- **NEW APPLICATION:** An application submitted in accordance with this rule for which the District has not already issued an ERC for reductions in rice straw burning for a parcel(s) prior to adoption of this Rule.
- **PARCEL:** A legally identifiable piece of land as registered with the County Assessor's office for property tax purposes and assigned an Assessors Parcel Number (APN).
- **RE-CERTIFICATION APPLICATION:** An application submitted in accordance with this rule for which the District has previously issued an ERC for reductions in rice straw burning for a parcel(s) prior to adoption of this Rule.
- **215 REGISTER:** The document that records all ERC deposits, withdrawals, transfers, and transactions.
- **216 RESTRICTED BURN LIST:** A list (maintained by the District) of parcels which have restrictions related to future agricultural burning.
- **217 RICE STRAW BURNING:** The intentional open burning of rice straw material. For the purpose of this Rule, rice straw burning is considered to be a source and such activity requires an agricultural burn permit.
- **218 RICE STRAW BURNING EMISSION REDUCTIONS:** Emission reductions that qualify for banking pursuant to Section 41865 of the California Health and Safety Code.
- **RICE GROWING ACREAGE:** The amount of acreage contained in a parcel that was used for the growing of rice during the baseline period.
- **SURPLUS:** The amount of emission reductions that are, at the time of generation of an ERC, not otherwise required by federal, state, or local law, not required by any legal settlement or consent decree, and not relied upon to meet any requirement related to the California State Implementation Plan (SIP). However, emission reductions required by a state statute that provides that the subject emission reductions shall be considered surplus may be considered surplus for purposes of this Rule if those reductions meet all other requirements of this section. Examples of federal, state, and local laws and of SIP-related requirements include, but are not limited to, the following:
 - 220.1 The federally-approved California SIP;
 - Other adopted State air quality laws, and regulations not in the SIP, including but not limited to, any requirement, regulation, or measure that: (1) the District or the State has included on a legally-required and publicly-available list of measures that are scheduled for adoption by the District or the State in the future; or (2) is the subject of a public notice distributed by the District or the State regarding an intent to adopt such revision;
 - 220.3 Any other source- or source-category specific regulatory or permitting requirement, including, but not limited to, Reasonable Available Control Technology (RACT), New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAP), Best Available Control Measures (BACM), Best Available Control Technology (BACT), and the Lowest Achievable Emission Rate (LAER); and
 - Any regulation or supporting documentation that is required by the federal Clean Air Act but is not contained or referenced in 40 Code of Federal Regulations (CFR) Part 52, including but not limited to: assumptions used in attainment and maintenance demonstrations (including Reasonable Further Progress demonstrations and milestone demonstrations), including any proposed control measure identified as potentially contributing to an enforceable near-term emissions reduction commitment; assumptions used in conformity demonstrations; and assumptions used in emissions inventories.

300 STANDARDS

- **DETERMINATION IF A PARCEL IS ELIGIBLE:** A particular parcel qualifies to generate ERCs under this rule if the following requirements are met:
 - 301.1 The parcel is located in the Sacramento Federal Non-attainment Area (SFNA) portion of Placer County; and
 - 301.2 Rice straw burning occurred on the parcel during the baseline period.
- **DETERMINIATION OF AVAILABLE ACREAGE:** The acreage available for generating ERCs shall be determined by adding all of the rice growing acreage of an applicant's eligible parcels and multiplying by the HBF. In no case shall the total available acreage for the entire District exceed 10,303 acres. In the event that the District receives applications which total more than 10,303 acres, the District shall lower the amount of acreage available for each application in accordance with Section 404.
- **DETERMINATION OF ANNUAL EMISSION REDUCTIONS AVAILABLE:** The amount of annual emission reductions available shall be determined by multiplying the available acreage times 75% times the applicable emission factor in the following table:

POLLUTANT	EMISSION FACTOR
Volatile Organic Compounds (VOC)	14.1 lbs/acre
Carbon Monoxide (CO)	172.2 lbs/acre
Oxides of Nitrogen (NOx)	15.6 lbs/acre
Oxides of Sulfur (SOx)	3.3 lbs/acre
Particulate Matter 10 (PM10)	18.9 lbs/acre

DETERMINATION OF QUARTERLY EMISSION REDUCTIONS AVAILABLE: The emission reductions shall be quantified on a calendar quarter basis. The following percentages shall be used to determine the amount of emission reductions in each calendar quarter:

CALENDAR QUARTER	PERCENTAGE
First Quarter (January – March)	24%
Second Quarter (April – June)	21%
Third Quarter (July – September)	12%
Fourth Quarter (October – December)	43%

- **PRIORITY RESERVE ADJUSTMENT:** The APCO shall transfer 5% of the calculated quantity of emission reductions to the District's Priority Reserve Bank.
- **DEED RESTRICTION:** Prior to the issuance of an ERC, a deed restriction shall be placed on the parcel or group of contiguous parcels for which ERCs will be granted and a copy provided to the District. The deed restriction shall prohibit agricultural burning on the parcel which is not consistent with the ERC.

- **RESTRICTED BURN LIST:** Prior to the issuance of an ERC, the District shall place the parcel or group of contiguous parcels on the restricted burn list. In each calendar year, no agricultural burn permit may be issued for greater than 25% of the acreage of any parcel listed on the restricted burn list.
- **BURNING PROHIBITION:** No person shall conduct agricultural burning on more than 25% of the rice growing acreage of a parcel which has received an ERC certificate pursuant to the provisions of this rule. In addition, applicants must comply with California Health & Safety Code (CH&SC) 41865.

400 ADMINISTRATIVE REQUIREMENTS

- **APPLICATION FILING DEADLINE:** All applications to obtain rice straw ERC certificates in accordance with this rule shall be submitted by August 19, 2009. Applications submitted after this date shall not be eligible for ERCs under this rule.
- **APPLICATION REQUIREMENTS NEW APPLICATIONS:** The applicant shall submit one application, identifying each parcel and each set of contiguous parcels. The application shall contain the following information:
 - 402.1 List of each parcel included in the application, including APN and any owner's designation or identifier.
 - 402.2 The acreage of each parcel that was used to grow rice during the baseline period, and documentation of such acreage.
 - 402.3 Documentation that rice straw burning occurred on the acreage of each parcel (identified above) during the baseline period. Examples of acceptable documentation include, but are not limited to, copies of a District agricultural burn permit, log books, pictures, or other District approved verifiable records.
 - 402.4 A statement of intent to file a deed restriction required by Section 306 for each parcel or for each set of contiguous parcels for which an application is being submitted (a copy of the deed restriction must be provided prior to final issuance of the rice straw ERC certificate).
 - 402.5 Filing fee in accordance with District Rule 601, PERMIT FEES.
- 403 APPLICATION REQUIREMENTS RE-CERTIFICATION APPLICATIONS: The applicant shall submit one application for each existing ERC certificate. In addition to the information in section 402, prior to re-issuance of the ERC, the applicant must surrender all previous certificates issued for rice straw burning on the parcel or group of contiguous parcels.
- **AVAILABLE ACREAGE ADJUSTMENT:** In the event that the District receives applications in which the requested available acreage totals more than 10,303 acres, the District shall lower the percentage available as follows:
 - The re-certification applications meeting the criteria of this rule shall get full credit on their acreage.
 - 404.2 The applications with verifiable burn records will have second priority. If the total available acreage for all these applications along with the re-certification applications does not exceed 10,303 acres, these applications will get full credit. If the total of all these applications along with the re-certification applications exceeds 10,303 acres, these applications shall be adjusted proportionally so that the total acreage for which all rice straw burning ERCs are issued does not exceed 10,303 acres.

405 APPLICATION PROCESSING PROCEDURES:

- 405.1 <u>Complete Application:</u> The APCO shall determine whether the application is complete not later than 30 days after receipt of the application for ERC certificates. If the APCO determines that the application is not complete, the applicant shall be notified in writing of the decision specifying the information required. If the specified information is not submitted within 30 days the application shall be canceled by the APCO.
- 405.2 <u>Additional Information:</u> Upon receipt of additional information for an incomplete application a new 30 day period to determine completeness shall begin. During the processing of the application, the APCO may request an applicant to clarify, amplify, correct, or otherwise supplement the information submitted in the application.
- 405.3 <u>Preliminary Decision:</u> Following acceptance of an application as complete, the APCO shall perform the evaluations required to determine compliance with all applicable District Rules and Regulations and make a preliminary written decision as to whether the emission reduction should be certified as ERCs. The decision should be supported by a succinct written analysis.
- 405.4 <u>Publication and Public Comment:</u> Within 10 calendar days following a preliminary decision, the APCO shall publish, in at least one newspaper of general circulation in the District, a notice stating the preliminary decision of the APCO, noting how the pertinent information can be obtained, and inviting written public comment for a 30 day period following the date of publication.
- 405.5 <u>Deed Restriction:</u> Within 90 calendar days of the public notice being published, the applicant shall submit a final copy of the legal deed restriction for all parcels upon which the ERC is based. The ERC shall not be issued prior to this submittal.
- 405.6 <u>Public Inspection:</u> The APCO shall make available for public inspection at the District office the information submitted by the applicant and the APCO's analysis no later than the date the notice of the preliminary decision is published, pursuant to Section 405.4. Further, all such information shall be transmitted to the California Air Resources Board and the US Environmental Protection Agency (EPA) regional office, and to any party which requests such information no later than the date of publication.
- 405.7 <u>Final Action:</u> Within 180 days after the application filing deadline in Section 401 of this rule, the APCO shall take final action on the applications, after considering all written comments.
- **VIOLATIONS:** Failure to comply with any provision or restriction of this rule shall be considered a violation of this rule.

500 MONITORING AND RECORDS

- **501 BURN RECORDS:** For any parcel or group of contiguous parcels for which a rice straw ERC certificate has been issued, the initial ERC holder or current land owner shall keep records of the amount of acres, crop type and burning that has occurred during the previous 5 years.
- **PROGRAM EVALUATION:** Within two (2) years after adoption of this rule, the District shall evaluate the program and submit an evaluation report to EPA. The report shall include a discussion of the total number of applications approved, total acreage subject to this rule, and total amount of ERCs issued.
