

REPORT OF CONVERSATION

The email below contains the content for the phone conversation that occurred on November 17, 2009 between Melanie Greene and Lahontan Staff.

The conversation addressed Lahontan's confidence in the data set. I had compiled the data into the excel files and Lahontan assigned staff to QA/QC the data. The November 17, 2009 conversation discussed the findings of the data and Bud assisted me directly with narrating Lahontan's conclusions regarding the WDr monitoring and reporting program. The analysis text directly reflects the input from this phone conversation.

Subject: Re: HMR

Melanie,

Here's the data from 2009 (pdf) and the updated compilation of WQ data. The student didn't get to far on the update, but you can use the summary of annual averages as is and add the 2009 data for completeness. Let me know if you have questions or need additional info.

Bud

Hey there Bud,

Anyway I could bug your student for the HMR data? Today, we are giving them what we have for the EIR thus far....

They are aware that the hydro chapter will be late, but I'm hoping to fill in as much as i can.

Happy Monday, Melanie
