

Before the Board of Supervisors  
County of Placer, State of California

**In the matter of:**

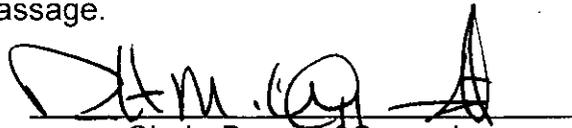

Adoption of the West Placer Storm Water Quality  
Design Manual

Resolution No.: 2016-122

The following Resolution was duly passed by the Board of Supervisors of the County of  
Placer at a regular meeting held June 21, 2016, by the following vote on roll call:

Ayes: DURAN, HOLMES, UHLER, MONTGOMERY, WEYGANDT  
Noes: NONE  
Absent: NONE

Signed and approved by me after its passage.

  
Chair, Board of Supervisors

Attest:

  
Clerk of said Board

---

THE BOARD OF SUPERVISORS OF THE COUNTY OF PLACER, STATE OF CALIFORNIA,  
DOES HEREBY RESOLVE AS FOLLOWS:

WHEREAS, the State of California, together with local municipalities, have developed storm water management strategies to address the adverse effects of development by implementing regulations and storm water management programs to preserve waterways and natural hydrologic processes; and

WHEREAS, storm water permits across the State of California now include requirements for low impact development ("LID") strategies that focus on preserving key elements of a project site's pre-development hydrologic function; and

WHEREAS, the West Placer Storm Water Quality Design Manual ("Manual") has been developed cooperatively between Placer County, the Cities of Roseville, Lincoln and Auburn and the Town of Loomis to provide a consistent regional approach to address storm water management within the West Placer area, the regulatory boundaries of which are identified in

Chapter 2 of said Manual and generally located in the urbanized areas of western Placer County (except the City of Rocklin); and

WHEREAS, the Manual is a regulatory compliance tool that addresses the requirements of the State Water Resources Control Board ("SWRCB") Water Quality Order No. 2013-001-DWQ, National Pollution Discharge Elimination System ("NPDES") General Permit No. CAS000004, Waste Discharge Requirements for Storm Water Discharges from Small Municipal Separate Storm Sewer Systems ("MS4s") (Phase II MS4 Permit); and

WHEREAS, the Manual addresses requirements under the proposed Placer County Aquatic Resources Program ("CARP") and provides guidance for using LID strategies to minimize impact to aquatic resources; and

WHEREAS, the goal of the Manual is to provide standards that both conform to the mandates of the Phase II MS4 Permit and achieve the objectives of the Placer County Conservation Plan's Aquatic Resource Program ("CARP"); and

WHEREAS, the intent of the Manual is to provide guidance and a standardized interactive tool, the Post-Construction Storm Water Quality Plan (SWQP) template, for regulated projects as defined in the Phase II MS4 Permit that are required to comply with Clean Water Act regulations and provides guidance for LID site design to reduce runoff, treat storm water and provide baseline hydromodification management; and

WHEREAS, the Manual's hydromodification management section and standardized SWQP template is intended to satisfy Phase II MS4 Permit requirements of the NPDES small municipal storm water program, which program is part of the Federal Clean Water Act and requires the County to regulate all projects that create and/or replace more than one acre of impervious surface to a required performance standard of maintaining post-project runoff at or below pre-project flow rates for the 2-year, 24-hour storm event; and

WHEREAS, the interactive Excel-based Post-Construction Storm Water Quality Plan (SWQP) template is intended to assist land development applicants and engineers as well as local agency staff to streamline the permit process by providing a standardized reporting format to be utilized across the West Placer area to show compliance with the Phase II MS4 Permit requirements; and

WHEREAS, the post-construction storm water control requirements described in the Manual will apply to regulated new development and redevelopment projects, as well as small projects such as detached single family homes that create and/or replace 2,500 square feet or more of impervious surface and are not part of a larger plan of development, located within the regulated urban area boundaries of said Manual.

**NOW THEREFORE BE IT RESOLVED BY THE BOARD OF SUPERVISORS OF THE COUNTY OF PLACER:**

1. The West Placer Storm Water Quality Design Manual, attached hereto as Exhibit "A", is hereby adopted.
2. This resolution shall be in full force and effect immediately upon adoption.

Exhibit "A" - West Placer Storm Water Quality Design Manual, April 2016
