## California Energy Consumption Database

The [California Energy Commission](#) has created this on-line database for informal reporting purposes using numerous electricity and natural gas consumption data sources.

Users can generate reports showing the amount of energy consumed by geographical area, sector (residential, commercial, industrial) classifications. The database also provides easy downloading of energy consumption data into Microsoft Excel (XLS) and comma-separated values (CSV) file formats.

For further information about, or problems with this database, please contact Steven Mac at [steven.mac@energy.state.ca.us](mailto:steven.mac@energy.state.ca.us) or call 916-651-1468. Members of the news media please call the Media and Public Communications Office at 916-654-4989.

### Electricity Consumption

- [Electricity Consumption by Entity](#)
- [Electricity Consumption by County](#)
- [Electricity Consumption by Planning Area](#)

### Natural Gas Consumption

- [Gas Consumption by Entity](#)
- [Gas Consumption by County](#)
- [Gas Consumption by Planning Area](#)

### Electricity Consumption

- [Electricity Consumption by Entity](#)
- [Electricity Consumption by County](#)
- [Electricity Consumption by Planning Area](#)

### Natural Gas Consumption

- [Gas Consumption by Entity](#)
- [Gas Consumption by County](#)
- [Gas Consumption by Planning Area](#)
