Hi Shannon,
No problem. Is this ok?

Marissa

Hi Marissa,

Thanks for providing the data. Will you be able to break down the VMT by land use? This will help to provide a more accurate estimate of project emissions.

Thanks,
Shannon

Mr. Shannon Hatcher

Subject: Homewood traffic information

Hi Shannon,

I have attached the level of service, trip generation, and VMT tables for the Homewood project alternatives for summer conditions. I will send the winter tables when they are finished.

Please let me know if you need any additional information, or have any questions.

Thanks,

Marissa Harned, EI
