Laura...attached is a summary of existing utility usage at Homewood as well as information on the diesel generators that support the ski lifts. There are 5 existing generators as opposed to the 4 I indicated in my prior correspondence.

Regards,

Thanks!! You are amazing.

I realized I left one assumption and one question for the water taxis out of the document. Could you also verify/answer the following?

Hours of operation: 9am-8pm (12 hours per day), 7 days a week What will be the first operational year for the two taxis? (i.e. how do they fit in with the overall schedule you are providing for construction?)

Thanks!

Hi David,

I have gone through what I have received from you and condensed our data needs. I have also developed several assumptions, which require your approval. Please see the attached documents. I really appreciate all your help. You are helping to ensure the environmental document will be completed in a timely manner. Thank you!
