Subject: Future Planning for Lake Tahoe

The best thing that could happen to the future of Lake Tahoe area is to limit, as much as possible, growth and particularly new housing. The number one problem, like the rest of the world, is over population. We have already outgrown the existing infrastructure. The biggest problem in trying to Keep Lake Tahoe Blue, is too many people. Go visit some of the lakes in the northern U.S. where housing and development has not been allowed and you'll see that the natural beauty has been protected and remains unchanged. Ronald Gregg, 7050 Timberwolf Dr, Tahoma.
