DOLLAR CREEK SHARED-USE TRAIL PROJECT

Initial Site Assessment

Executive Summary

Environmental Science Associates (ESA) has conducted an Initial Site Assessment (ISA) of the Dollar Creek Shared-Use Trail Project (Project) located in Placer County, primarily within California Tahoe Conservancy (Conservancy) and North Tahoe Public Utility District (NTPUD) owned properties, between the intersection of Dollar Drive and SR 28 and the terminus of Fulton Crescent Road (see project location map). The Project establishes a separated shared-use trail, extending the backbone of the existing north shore bicycle trail network, linking residential uses to jobs, schools, shopping, and recreation and community areas. The approximately 2.5 mile long trail will link the existing Tahoe City to Dollar Point trail that ends near the intersection of Dollar Drive and SR 28 to the end of Fulton Crescent Road and will utilize public lands owned by the NTPUD and Conservancy. The property assessed for this ISA includes the immediate area surrounding the proposed trail alignment and is referred to as the “project area” or the “project site” in this report. Adjacent land uses consist of mountain homes and continued mountain terrain. According to ESA’s review of historical sources, including historical aerial photographs and topographic maps, the first development in the project area occurred with portions of the existing dirt trail system prior to 1940 with construction of existing residences occurring during the 1960s.

This ISA identifies Recognized Environmental Conditions (RECs) for the project site that may adversely affect roadway construction or project corridor right-of-way acquisition (if required). This ISA was conducted in general conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Practice E 1527-05. This ISA includes a summary of the site reconnaissance conducted on October 11, 2011, a review of environmental databases, and a review of historical data sources. ESA has performed this ISA in general conformance with the scope and limitations of ASTM E 1527-05 for the project site, defined as the Dollar Creek Shared-Use Trail, Placer County, California. Any exceptions to or deletions from these ASTM practices are described later in this report.

This report has revealed no evidence of RECs in connection with the project site. The project site does not appear on any of the searched database lists for RECs. A REC is defined by ASTM Practice E 1527-05 as: “The presence or likely presence of any hazardous substances or petroleum products on a project site under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the project

site or into the ground, groundwater, or surface water of the project site. The term includes hazardous substances or petroleum products even under conditions of storage and use in compliance with local and state laws and regulations.” The EDR environmental database report did not identify the project site on any of the searched databases, however, six properties within the 1/8 mile search radius (1/4 mile total search area) were found to be listed. The location of these sites can be seen in the Corridor Area Map at the end of Appendix C. Two of these sites are Leaking Underground Storage Tanks (LUSTs) that were closed in 2001. No further action is required at those sites. The other sites are locations of underground storage tanks that are not known to have leaked and none of these listed sites are within the Project’s area of potential effect (APE) and none of them will be affected or otherwise disturbed by Project construction or operation.

1.0 Introduction

1.1 Purpose and Involved Parties

This ISA documents the evaluation of the project area for indications of “recognized environmental conditions.” A REC is defined by the ASTM Practice E 1527-05 as: “The presence or likely presence of any hazardous substances or petroleum products on a project site under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the project site or into the ground, groundwater, or surface water of the project site. The term includes hazardous substances or petroleum products even under conditions of storage and use in compliance with local and state laws and regulations. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of regulatory governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.”

ESA received authorization from the County of Placer (County), California Department of Transportation (Caltrans), and the primary land owners (Conservancy and the NTPUD) to conduct an ISA of the project site, defined as the Dollar Creek Shared-Use Trail, Placer County, California. This ISA has been prepared for the County and Caltrans, and they (only) have the right to rely on the contents of this ISA.

1.2 Scope of Services, Significant Assumptions, and Limitations

The services provided for this project consisted of the following:

- Provide a description of the project area including current land uses;
- Provide a general description of the topography, soils, geology, and groundwater flow direction;
- Review reasonably ascertainable and reviewable regulatory information published by federal, state, local, tribal, health, and/or environmental agencies pertaining to the project area;

- Review historical data sources for the project area, including aerial photographs, topographic maps, fire insurance maps, city directories, and other readily available development data;
- Conduct an area reconnaissance and an environmental review—including a visual inspection of adjoining properties—with a focus on indications of hazardous substances, petroleum products, wells, storage tanks, solid waste disposal pits and sumps, and utilities;
- Interview current owners and occupants of businesses located near the project area that are likely to use hazardous materials in their operations and interview other persons with knowledge of the development history of the project area;
- Prepare a written report of methods, findings, and conclusions.

The goal of this scope of services is to assist the user in identifying conditions in the project area that may indicate risks regarding hazardous materials storage, disposal, or other impacts. The resulting report may qualify the user for relief from liabilities as one of three “defenses” identified in the 2002 Brownfields Amendments to the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 9607 (All Appropriate Inquiry subsections). These three defenses include:

1. The “innocent landowner” defense to potential liabilities under 42 United States Code [U.S.C.] §9601.
2. The “contiguous property owner” defense pursuant to 42 U.S.C. §9607q.
3. The “bona fide prospective purchaser” defense pursuant to 42 U.S.C. §9607r.

Federal regulations at 40 Code of Federal Regulations [C.F.R.] Part 312, promulgated by the United States (U.S.) Environmental Protection Agency (EPA), require that liability release be based (in part) on completion of All Appropriate Inquiries (AAI) prior to purchase of a property.

Those inquiries are documented by Phase I reports, or ISAs/Environmental Site Assessments (ESAs). EPA has agreed that the recently developed ASTM guidance (ASTM Practice E 1527-05) specifies and interprets AAI requirements.

Per Caltrans site investigation guidance, Caltrans has a process for evaluating asbestos and lead within a project site, and separate guidance documents provide the methodology and technologies for these specific site investigations. Although asbestos and lead may be present within a site, these issues would be addressed by Caltrans under separate assessment(s). A REC, as defined by ASTM, would not include asbestos and LBP, as these are typical construction waste management issues.

Those land uses and conditions that have the potential to produce or cause site contamination and materials that require special handling have been categorized. These land uses and conditions are grouped into high, medium, and low risk categories. Per the Caltrans Standard Environmental Reference (2010), examples of land uses and conditions determined by Caltrans to pose a “Low Risk to Project Cost, Scope, and Schedule” include asbestos in bridges, retaining walls, etc., and LBP and other lead containing materials on bridges, retaining walls, etc.” ESA has made certain assumptions in preparing the scope of this assessment:

- Data gathered from public information sources (i.e., libraries or public regulatory agencies) are accurate and reliable.
- Site operations reflect site conditions relative to potential releases and no intentional concealment of environmental conditions or releases has occurred.
- Interview information is directly reported as gathered by the assessor and is limited by the accuracy of the interviewee's recollection and experience.
- Published geologic information and site observations made by the environmental professional are used to estimate likely contaminant migration pathways in the subsurface. These estimates by the environmental professional are limited in accuracy and are generally cross-referenced with existing information about similar sites and environmental releases in the area.
- Regulatory information is limited to sites discovered after the late 1980s because reliable records were not kept by regulatory agencies prior to that time frame. Where a REC has resulted from historical uses or conditions, but apparently no longer persists at the site, the term "historical REC" is used.

The findings and conclusions presented in this report are based on the procedures described in ASTM Practice E 1527-05, informal discussions with various agencies, a review of the available literature cited in this report, conditions noted at the time of this ISA, and ESA's interpretation of the information obtained as part of this ISA. The findings and conclusions are limited to the specific project and properties described in this report, and by the accuracy and completeness of the information provided by others.

An ISA/Environmental Site Assessment cannot entirely eliminate uncertainty regarding the potential for RECs. Conducting this assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with a project area within reasonable limits of time and cost. In conducting its services, ESA used a degree of care and skill ordinarily exercised under similar circumstances by reputable members of its profession practicing in the same locality. No other warranty is made or intended. This ISA generally conforms to the level of documentation required in ASTM Practice E 1527-05.

2.0 Site Description

2.1 Location and Legal Description

The Project proposes to create an approximately 14 foot wide (to include 10 feet of trail and 2 foot wide clear zones on either side of trail) paved Class 1 bike path primarily within Conservancy and NTPUD owned properties, between the intersection of Dollar Drive and SR 28 and the terminus of Fulton Crescent Road, north of Dollar Point on the northwest shore of Lake Tahoe in Placer County, CA (see the location map located in Appendix A). The Project establishes a separated shared-use trail, extending the backbone of the existing north shore bicycle trail network, linking residential uses to jobs, schools, shopping, and recreation and community areas. The approximately 2.5 mile long trail will link the existing Tahoe City to Dollar Point trail that ends near the intersection of Dollar Drive and SR 28 to the end of Fulton Crescent Road and will utilize public lands owned by the NTPUD and Conservancy. The property assessed for this ISA includes the immediate area

surrounding the proposed trail alignment, known as the area of potential effect (APE), and is referred to as the “project area” or the “project site” in this report. The APE has been established as 15 ft (both sides) from the center-line of the proposed trail alignment to accommodate the entire shared-use trail corridor, including neighborhood connectors, trailhead parking, temporary construction access points and temporary work/staging areas. Adjacent land uses consist of mountain homes and continued mountain terrain. According to ESA’s review of historical sources, including historical aerial photographs and topographic maps, the first development in the project area occurred with portions of the existing dirt trail system prior to 1940 with construction of existing residences occurring in the 1960s.

2.2 Site and Vicinity Characteristics

The Project alignment generally follows existing dirt trails and roads constructed on the former Firestone and Dollar Parcels, encompassing other adjacent parcels nearby as needed to improve trail connections or reduce or avoid environmental effects. Residential subdivisions are in close proximity to the beginning and end of this trail segment. The trail passes through mountain terrain typical to the Lake Tahoe area. The Project implements specific goals and policies of the TRPA to provide a non-motorized alternative transportation corridor in the north shore of Lake Tahoe and is consistent with the Conservancy’s outdoor recreation program requirements. Trail development details comply with the American Association of State Highway and Transportation Officials (AASHTO) guidelines and American Disability Act (ADA) design standards and may include informal trail consolidation or decommissioning and disturbed land restoration along its length. The Dollar Creek Dam and a collapsed ice house are located near the trail alignment but will not be disturbed or otherwise affected by the proposed Project. In addition to various discarded metal and concrete, litter, including bottles and cans can be found in limited quantities along the trail alignment.

Other than the Dollar Creek Dam and the collapsed ice house, no other improvements are present in the vicinity of the trail alignment or APE. Adjacent land uses consist of mountain homes and continued mountain terrain.

The elevation of the trail alignment ranges from 6500 to 6800 feet above mean sea level (USGS, 1994). The topography in the project area and surrounding areas is mountainous, with an overall slope from west to east. The topography and geographic location suggest that shallow groundwater flows from northwest to southeast.

According to the United States Department of Agriculture, Natural Resources Conservation Service’s soil survey maps, soils in the immediate vicinity of the project site are Tahoma very cobbly sandy loam, 2 to 15 percent slopes, very stoney and Tahoma-Jorge complex, 2 to 15 percent slopes. The Tahoma very cobbly sandy loam series consists of well drained soils covered with cobbles, stones or boulders. The Tahoma-Jorge complex is also well drained and covered with cobbles, stones or boulders.

Naturally occurring asbestos (NOA) is known to be present in Placer County. To help identify areas in the county that may contain NOA, the California Department of Conservation, California

Geological Survey (CGS), has prepared a 1:100,000-scale map (Plate 1) of relative likelihood for the presence of naturally occurring asbestos in Placer County. The project site is not located near any of the areas identified as containing Ultramafic Rocks and is mapped as an Area Least Likely to Contain NOA (California Department of Conservation, 2006).

2.3 Description of Structures, Roads, and Other Site Improvements

Many of the existing dirt trails have been in existence since at least the early 1940s with the existing nearby residential homes being constructed in the 1960s. The land uses adjacent to the proposed trail are currently, and historically have been, primarily mountain homes and mountain terrain typical to the area. Other than existing mountain homes, the Dollar Creek Dam and the collapsed ice house, no other improvements are present in the project area.

2.4 Area Geology and Hydrogeology

The Project area is located within the Sierra Nevada Geomorphic Province, specifically the Tahoe-Truckee Sub-section. This province is a 400 mile tilted fault block with the eastern face being more rugged and steep compared to the gentle western slope that plummets beneath the adjacent San Joaquin Valley. The topography in the project area and surrounding areas is mountainous, with an overall slope from west to east. Dollar Creek flows through the project area from west to east and includes a small reservoir behind the Dollar Creek Dam, which will not be affected by the Project.

The Tahoe-Truckee Sub-section contains moderately steep plateaus and steep mountains. Streams form canyons with steep side-slopes. Elevation ranges from 5000 ft along the Truckee River to 9143 ft at Mt. Lola. No water wells were identified within the 1/8 mile radius search area. It is expected that depth to groundwater varies in the vicinity of the project site. Without sufficient water depth and elevation measurements, groundwater flow is determined by topographic features. The topography and geographic location suggest that shallow groundwater flows from northwest to southeast.

3.0 User-Provided Information

The County and Caltrans' intention is to create an approximately 14 foot wide paved Class 1 bike path from Dollar Point to the terminus of Fulton Crescent Road, that will allow riders, along with other trails, to travel from Sugar Pines State Park, east to Squaw Valley, and north to Kings Beach on SR 267. Caltrans has specialized knowledge of spills and related cleanups on California highways, and has no record of spills within one mile of the project site. The County provided a site location map and an exhibit of the proposed trail alignment.

4.0 Records Review

4.1 Environmental Records Review

ESA completed a database search of federal, state, and tribal environmental records for the project site. A computerized environmental information database search was performed for the project site by Environmental Data Resources Inc. (EDR) on November 1, 2011 (EDR, 2011). The databases searched included federal, state, local, and tribal databases as defined by ASTM E 1527-05, plus proprietary databases maintained by EDR. The search radius distances are based on the minimum distances established by ASTM and commonly used for environmental site assessments. In this case the project is linear (a trail), so a 1/8 mile radius search distance from each side of the trail (1/4 mile in total) was used for the database search. The EDR environmental database report did not identify the project site on any of the searched databases, however, six properties within the 1/8 mile search radius (1/4 mile total search area) were found to be listed. The location of these sites can be seen in the Corridor Area Map at the end of Appendix C. Two of these sites are Leaking Underground Storage Tanks (LUSTs) that were closed in 2001. No further action is required at those sites. The other sites are locations of underground storage tanks that are not known to have leaked and none of these listed sites are within the Project's area of potential effect (APE) and none of them will be affected or otherwise disturbed by Project construction or operation. A complete copy of the EDR environmental database report, including a detailed description of all databases searched is included in Appendix C.

4.2 Local Government Information

The Placer County Environmental Health Division has not published a list of all Open Groundwater/Soil Contamination Sites Placer County. There are no known or documented releases of hazardous substances at the project site. The Division of Environmental Health does not have public records or other potentially relevant documents related to the project site.

4.3 Historical Use Information

The objective of reviewing historical use information is to develop a history of previous land uses in the vicinity of the project area and to assess these uses for potential hazardous materials impacts that may affect the project. ESA reviewed the following historical sources that were readily available and reviewable and likely to provide useful information, given the time and cost constraints inherent in ISA projects.

Fire Insurance Maps

Fire insurance maps are produced by private fire insurance companies to indicate uses of the project area on specified dates. ESA requested fire insurance maps from EDR, the copyright holder for the Sanborn map collection. EDR reported that no Sanborn fire insurance map coverage exists for the project site.

Historical Aerial Photographs

Historical aerial photographs are valuable for the environmental assessor to review features of properties along the project corridor over a long period of time. ESA reviewed historical aerial photographs available online. Historical aerial photographs were reviewed from 2005 back to 1969. Coverage was available for four years of that 36-year span, with the longest gap in coverage being 23 years (between 1969 and 1992). The 1969 aerial and each subsequent photograph showed at least portions of the existing dirt trail system, existing mountain residences, and the Dollar Creek Dam.

4.4 Environmental Liens and Additional Information

No information regarding the chain-of-title ownership history or environmental liens recorded against the project site was provided by the user. Environmental lien searches were not conducted as part of the scope of work for this project.

4.5 Summary of Previous Environmental Investigations

No previous environmental investigations were reviewed for this report.

5.0 Site Reconnaissance

5.1 Site Reconnaissance

On October 11, 2011 ESA conducted a reconnaissance of the trail alignment and surrounding land uses. The weather that day was clear and warm, and the trail alignment was accessible from public locations. ESA was able to observe the land composing the proposed trail alignment and adjacent land bordering the trail. Photographs documenting the reconnaissance findings are included in Appendix B.

The entire trail alignment, including the 15-foot from center line APE, was observed for potential RECs. As previously described, immediate surrounding land uses consist of continued mountainous terrain with occasional nearby mountain homes. It is important to note that although “undeveloped” land generally means no structures are present, these properties could potentially have environmental issues as a result of historical use (i.e., dam and ice house construction). Current land uses (those associated with residential activities rather than commercial or industrial uses) surrounding the proposed trail alignment are considered to be of a very low risk of chemical use, solid waste sites, aboveground or belowground storage tanks, etc. Although historical use could have occurred, it is very unlikely and adjacent properties do not currently exhibit these types of uses. Based on the results of the records review and reconnaissance, potential RECs were not observed along, or adjacent to, the trail alignment.

5.2 Known Current and Past Uses of the Site and Adjoining Properties

According to ESA's review of historical sources, including historical aerial photographs and topographic maps, the first development in the project area occurred with portions of the existing dirt trail system prior to 1940 with construction of existing residences occurring during the 1960s.

5.3 Utilities and PCBs

During the site reconnaissance, ESA did not observe any signs indicating subsurface utilities. No pole-mounted transformers, large power substations, or step-down transformers were noted. No spills or hazardous materials response events related to transformers were noted in the EDR report.

6.0 Data Gap Analysis

The ASTM E 1527-05 standard requires a listing of "data gaps" encountered during the investigative process that may affect the validity of the conclusions drawn by the environmental professional. The ASTM E 1527-05 standard also requires that the environmental professional estimate the relative importance of the data gaps. Generally, gaps in available data are related to the availability of historical data sources for specific sites of concern. The environmental professional uses multiple historical data sources as a method to provide coverage for data gaps. Historical information is collected on a recurring basis, and the passage of time between data sets may or may not constitute a significant gap in data coverage. For this project, the following items may constitute a data gap as defined by ASTM:

- Absence of Sanborn fire insurance maps
- Absence of aerial photography prior to 1969

The inability to obtain and review the Sanborn fire insurance maps and the lack of aerial photography prior to 1969 do not appear to present significant data gaps because of the presence of other supporting historical information and the limited development in the area since 1969.

7.0 Findings and Conclusions

ESA has conducted an ISA of the project site, identified as the Dollar Creek Shared-Use Trail, Placer County, California. The ISA was performed in general conformance with the scope and limitations of ASTM Practice E 1527-05. Any exceptions to, or deletions from, this practice are described previously in this report. ESA personnel observed no RECs, as defined in ASTM Practice E 1527-05, in connection with the project site.

While the EDR environmental database report identified six properties within the 1/8 mile search radius (1/4 mile total search area), the database report did not identify the project site on any of the searched databases. Furthermore, none of these listed sites are within the Project's APE and none of them will be affected or otherwise disturbed by Project construction or operation. A complete copy of the EDR environmental database report, including a detailed description of all databases searched is included in Appendix C.

8.0 Recommendations

Recommendations included in this report have been developed through the investigative procedures described in the *Scope of Services, Significant Assumptions, and Limitations* section of this report. These findings should be reviewed within the context of the limitations provided in the *Limitations* section. Based on the location and specific details of the identified risk sites, ESA has identified no RECs in connection with the proposed Project. This conclusion has led to the inclusion of the following statement as required by ASTM E 1527-05:

ESA has performed an Initial Site Assessment in general conformance with the scope and limitations of ASTM E 1527-05 of the proposed Project, defined as the Dollar Creek Shared-Use Trail, Placer County, California. Any exceptions to or deletions from these practices are described in previous sections of this report. This report has revealed no evidence of RECs in connection with the project site.

8.1 Additional Considerations

Health and Safety Plans

Health and safety considerations for construction workers must be taken into account during development of a Health and Safety Plan (HASP) for the project. The HASP should describe appropriate procedures to follow in the event that any contaminated soil or groundwater is encountered during construction activities. Any unknown substances should be tested, handled and disposed of in accordance with appropriate federal, state and local regulations.

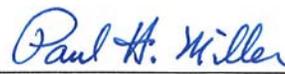

9.0 Qualifications of Environmental Professionals

9.1 Signatures and Qualifications

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in Section 312.10 of 42 Code of Federal Regulations [C.F.R.] Part 312. This ISA was conducted under the supervision of a qualified environmental professional. The preceding report has been prepared in general conformance with standard industry practice for performance of Environmental Site Assessments and includes the applicable portions of the investigation procedures codified in ASTM E 1527-05, Standard Practice for Environmental Site Assessments: Environmental Site Assessment Process. The end user of this report may rely on the contents, findings, and conclusions to be accurate within the limitations stated in this report and in the ASTM standard. The report also complies with specific requirements supplied by the client.

Qualified Environmental Professional
Aaron Hecock, AICP
Environmental Planner

Qualified Environmental Professional
Paul Miller
Senior Hazardous Materials Manager

Qualifications of Environmental Professionals

This ISA was performed by the following ESA personnel. Mr. Aaron Hecock, ESA's qualified environmental professional, as defined by ASTM Practice E 1527-05, has 5 years of experience in the assessment of impacted properties and compliance with environmental regulations. He has a Masters Degree in City and Regional Planning from Cal Poly San Luis Obispo and a B.A. in Political Science from The University of Arizona.

Qualifications of QA/QC Review Professionals

Reviews for quality assurance, quality control, and technical peer review were performed by the following ESA personnel. Mr. Paul Miller, ESA's qualified environmental professional, as defined by ASTM Practice E 1527-05, has more than 21 years of experience in the assessment and remediation of impacted properties and compliance with environmental regulations. He has a B.A. in Zoology from Miami University, a M.S. in Zoology and Entomology from Colorado State University and is a Registered Environmental Assessor (# 00926). In addition, Mr. Miller was for approximately 10 years a Certified Asbestos Building Inspector and Management Planner under the EPA's AHERA programs. Mr. Miller's technical areas of expertise include energy, integrated waste management, air quality and noise analyses. With a broad range of environmental skills, he has applied his background since 1986 to CEQA and NEPA environmental assessments and has been integral in the preparation of over 250 CEQA and NEPA environmental documents, including project manager for more than 18 major EIRs.

Manufactured Gas Plants..... EDR Proprietary Manufactured Gas Plants

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/14/2010 has revealed that there is 1 FINDS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
EQUILON ENTERPRISES	HWY 28/ FABIAN WY	5	8

STATE AND LOCAL RECORDS

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTIS].

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
<i>POOL AND RECREATION AREA</i>	<i>170 OBSERVATION DR</i>	<i>6</i>	<i>10</i>

EXECUTIVE SUMMARY

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 09/19/2011 has revealed that there are 2 LUST sites within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
POOL AND RECREATION AREA Status: Completed - Case Closed	170 OBSERVATION DR	6	10
DOLLAR POINT HOMEOWNERS ASSOCI	170 OBSERVATION DRIVE	6	11

CA FID UST: The Facility Inventory Database contains active and inactive underground storage tank locations. The source is the State Water Resource Control Board.

A review of the CA FID UST list, as provided by EDR, and dated 10/31/1994 has revealed that there is 1 CA FID UST site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
DOLLAR POINT SHELL	3145 N LAKE BLVD	3	5

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 09/19/2011 has revealed that there is 1 UST site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
SHELL/DOLLAR POINT STATION	3205 NORTH LAKE BLVD	2	5

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>	<u>Page</u>
DOLLAR POINT SHELL	3145 N LAKE BLVD	3	5

EXECUTIVE SUMMARY

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2010 has revealed that there are 3 HAZNET sites within the searched area.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/30/2011	Source: EPA
Date Data Arrived at EDR: 07/12/2011	Telephone: N/A
Date Made Active in Reports: 09/29/2011	Last EDR Contact: 10/12/2011
Number of Days to Update: 79	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 09/01/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/12/2011
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

Number of Days to Update: 62	Next Scheduled EDR Contact: 12/12/2011
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 09/09/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/16/2011	Telephone: 202-564-6023

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/09/2011	Source: EPA
Date Data Arrived at EDR: 03/15/2011	Telephone: 800-424-9346
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 08/15/2011
Number of Days to Update: 91	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: Quarterly

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011
Date Made Active in Reports: 08/08/2011

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 07/05/2011	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 07/05/2011	Telephone: 202-366-4555
Date Made Active in Reports: 09/30/2011	Last EDR Contact: 10/04/2011
Number of Days to Update: 87	Next Scheduled EDR Contact: 01/16/2012
	Data Release Frequency: Annually

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 01/12/2011	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/11/2011	Telephone: 202-366-4595
Date Made Active in Reports: 05/02/2011	Last EDR Contact: 08/09/2011
Number of Days to Update: 80	Next Scheduled EDR Contact: 11/21/2011
	Data Release Frequency: Varies

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: Quarterly

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 06/27/2011
Date Data Arrived at EDR: 06/27/2011

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2009	Source: EPA/NTIS
Date Data Arrived at EDR: 03/01/2011	Telephone: 800-424-9346

Number of Days to Update: 36	Next Scheduled EDR Contact: 01/23/2012
	Data Release Frequency: Varies

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007	Source: Drug Enforcement Administration

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

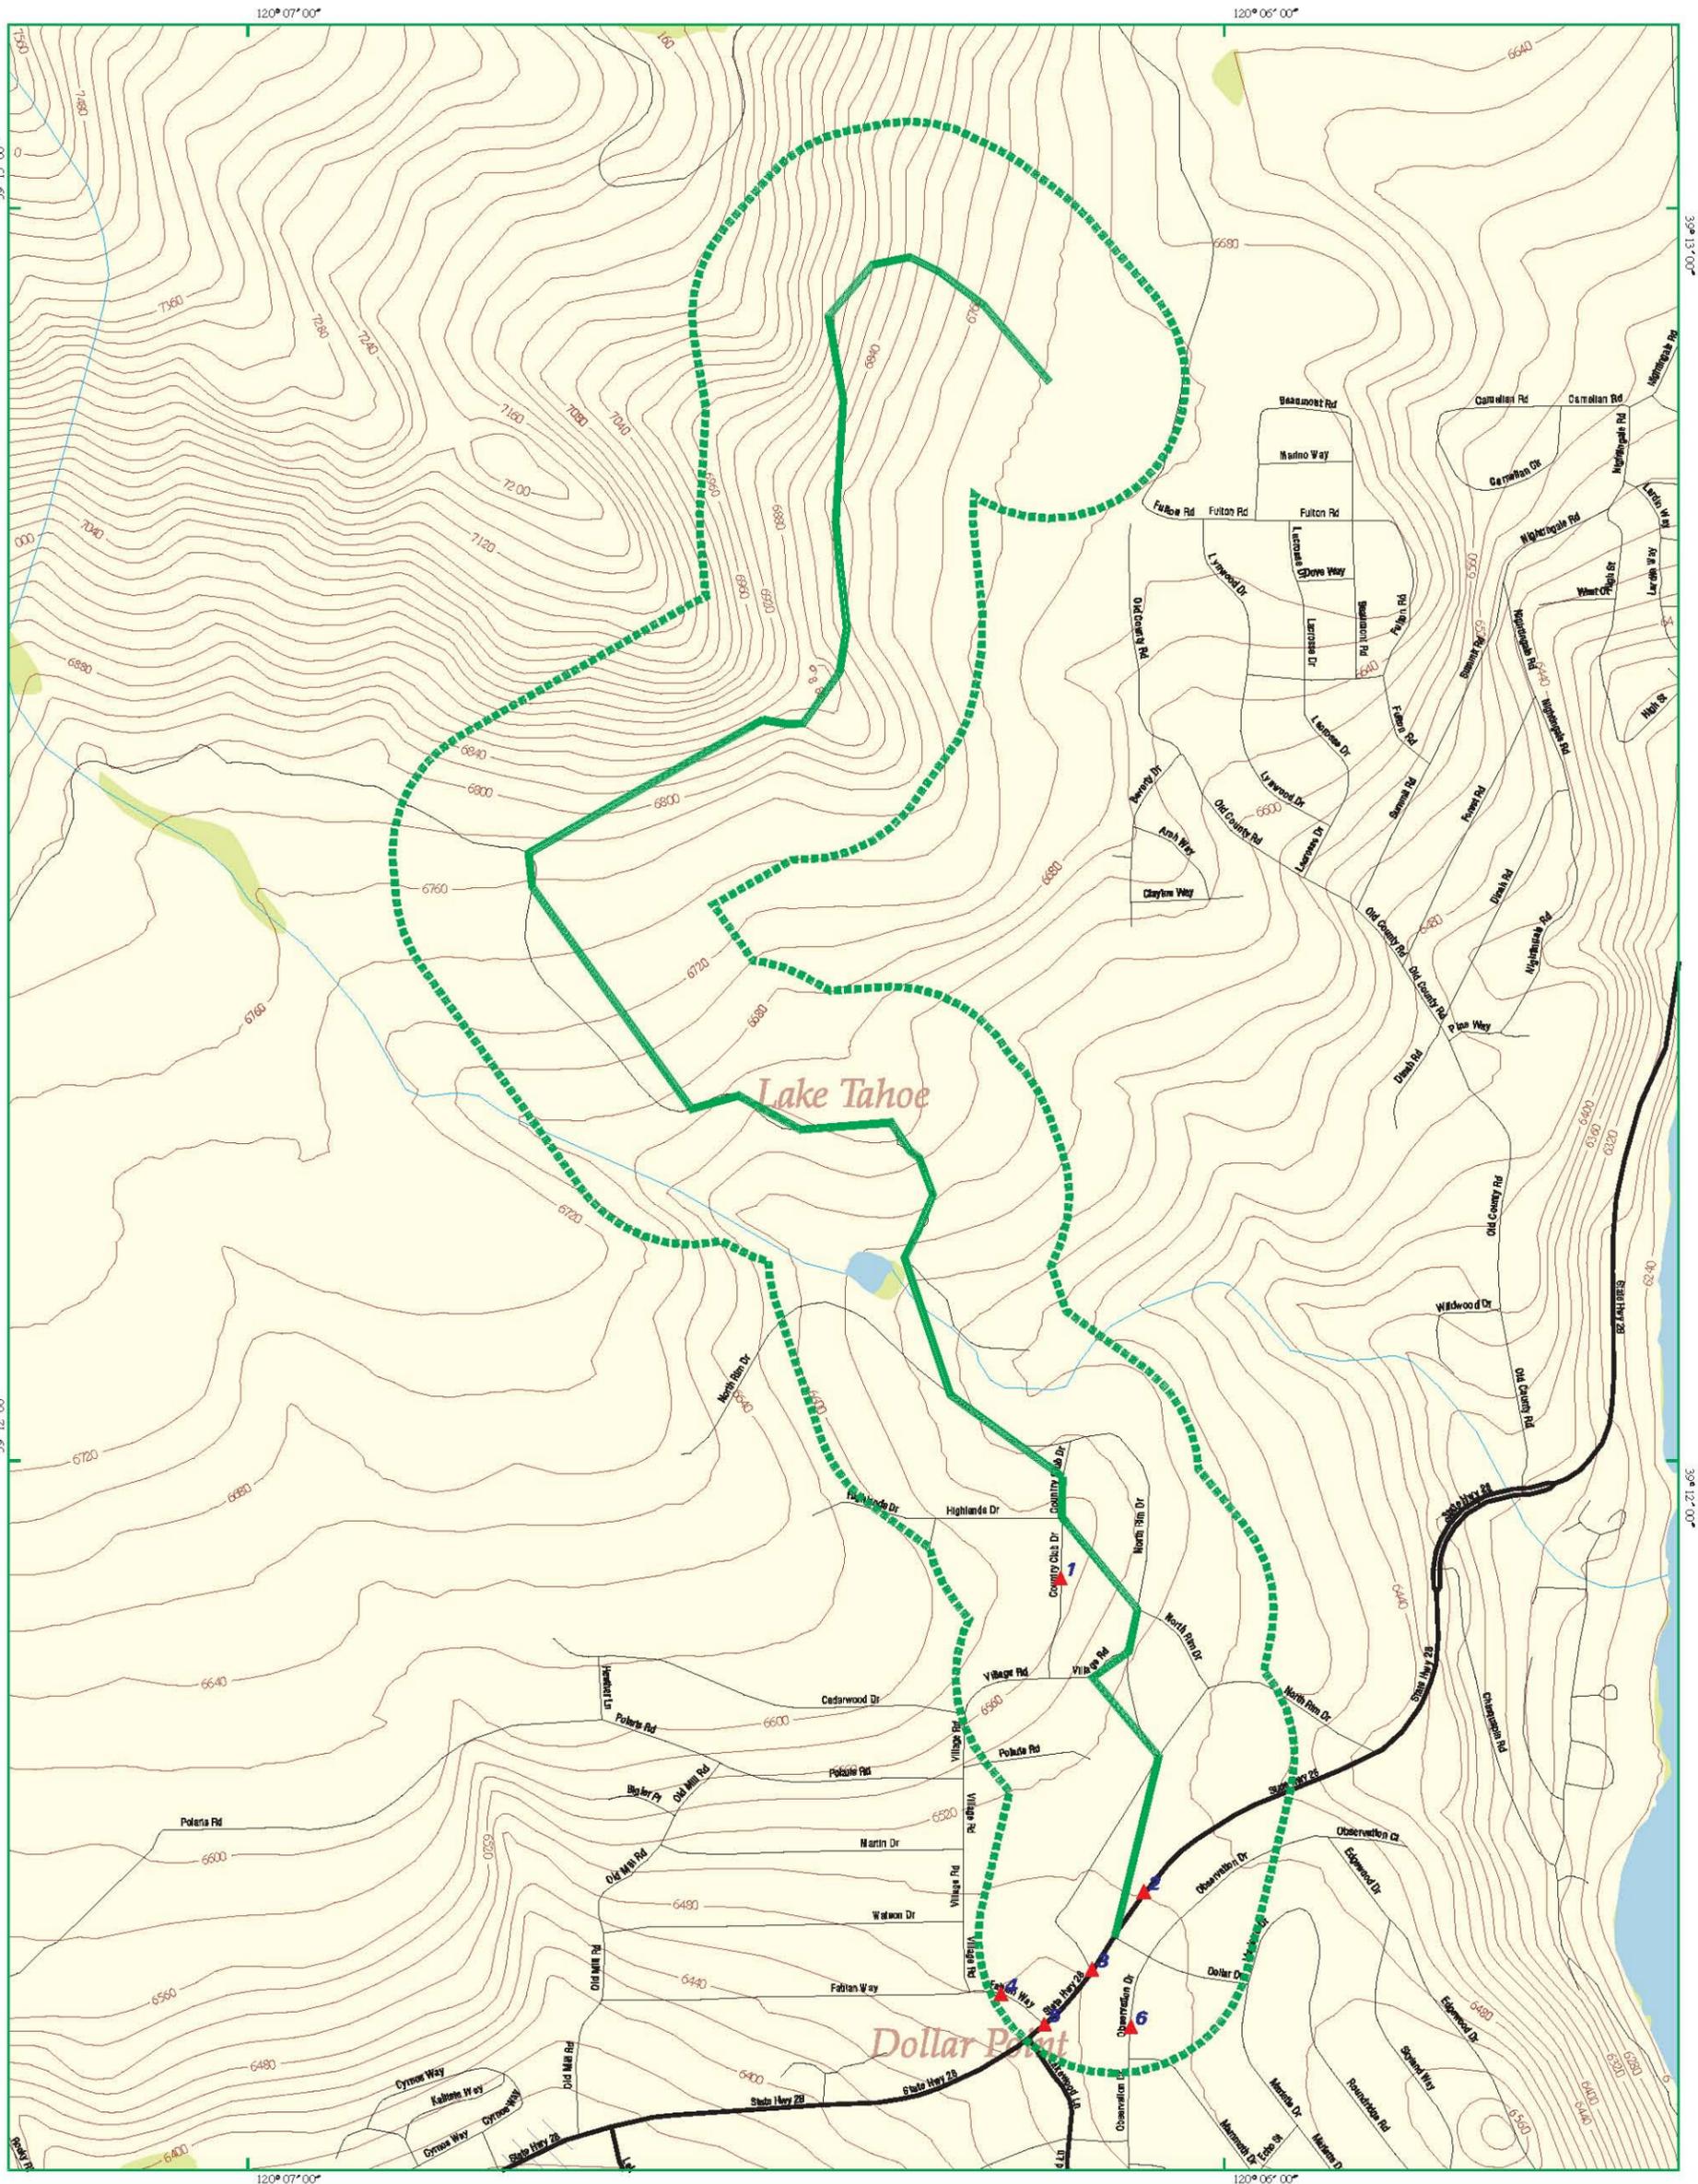

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Appendix D

ISA Checklist

Initial Site Assessment (ISA) Checklist

Project Information

District ____ County ____ Route ____ Post Mile _____ EA _____

Description _____

Is the project on the HW Study Minimal-Risk Projects List (HW1)? _____

Project Manager _____ phone # _____

Project Engineer _____ phone # _____

Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

1. Project Features: New R/W? _____ Excavation? _____ Railroad Involvement? _____

Structure demolition/modification? _____ Subsurface utility relocation? _____

2. Project Setting _____

Rural or Urban _____

Current land uses _____

Adjacent land uses _____

(industrial, light industry, commercial, agricultural, residential, etc.)

3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.

4. Conduct Field Inspection. Date _____ Use the attached map to locate potential or known HW sites.

STORAGE STRUCTURES / PIPELINES:

Underground tanks _____ Surface tanks _____

Sumps _____ Ponds _____

Drums _____ Basins _____

Transformers _____ Landfill _____

Other _____

Initial Site Assessment (ISA) Checklist (continued)

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining _____ Oil sheen _____

Odors _____ Vegetation damage _____

Other _____

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

Buildings _____ Spray-on fireproofing _____

Pipe wrap _____ Friable tile _____

Acoustical plaster _____ Serpentine _____

Paint _____ Other _____

5. Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.

6. Other comments and/or observations: _____

ISA Determination

Does the project have potential hazardous waste involvement? _____ If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? _____ If "YES," explain; then give an estimate of additional time required: _____

A brief memo should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

ISA Conducted by _____ **Date** _____
