

RULE 408 SOURCE RECORD KEEPING AND REPORTING

Adopted 11-12-74
(Amended 05-24-77, 10-19-93)

The owner or operator of any stationary source, shall, upon notification from the District, maintain records of the nature and amounts of emissions from such sources and/or any other information as may be deemed necessary by the District to determine whether such source is in compliance with applicable emission limitations or other control measures. The Air Pollution Control Officer may require that such records be certified by a professional engineer, registered in the State of California. Such studies shall be at the expense of the person causing the emissions.

The information recorded shall be summarized and reported to the District, on forms or formats as furnished by the District, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1 - June 30 and July 1 - December 31, except that the initial report period shall commence on the date the District issues notification of the recordkeeping requirements.

Information reported by the owner or operator and copies of the summarizing reports submitted to the District shall be retained by the owner or operator for two years after the date on which the pertinent report is submitted.
