

EXHIBIT 18 – Uniform Method of Assigning EDUs

EDUs will be assigned as follows:

1. EDUs for single residential units will be determined based on a 215 gallons per day (gpd) per unit (detached house, condominium, apartment, etc.) with a Biological Oxygen Demand (BOD) and Suspended Solids level (SS) less than or equal to 300 mg/l.
2. Before Treatment Substantial Completion, the Authorized Representatives will jointly agree upon a method for assigning EDUs to non-residential dischargers.
