

Notice of Night Work

Placer County contractors will be working at the SMD 3 Wastewater Treatment Plant (WWTP) for 5 to 6 nights over the next few weeks. Night work is necessary to allow for a steady supply of concrete delivery to backfill the emergency storage tanks that have recently been set as part of the SMD 3 Regional Sewer Project.

What to expect

- Work will take place from 6:00 p.m. to 2:00 a.m. Measures will be taken to minimize impacts from noise and light during the work.
- Trucks will frequently be entering and exiting the WWTP site. Performing this work at night will minimize traffic impacts on Auburn Folsom Road during the day.

SMD 3 Regional Sewer Project Update

Auburn Folsom Road

The sewer pipeline has been installed. Remaining work includes paving and connecting to the existing sewerline at Twin Rocks Road.

SMD 3 WWTP

The underground tanks have been set. Remaining work includes backfilling tanks, constructing the new pump station, and decommissioning the existing plant.
