AGRICULTURAL ELECTRIC SERVICE PERMIT INFORMATION AND DECLARATION

This form must be completed for new electric service requests or upgrades to an existing electric service whenever the primary use on a property is an existing or proposed agricultural operation.

- 1. A copy of the issued water well permit or written approval from the local water district to use ditch (canal) water.
2. Three (3) copies of a single line drawing/site plan, depicting all the electrical wiring, conduit, trenching depth and length, and equipment proposed, including equipment voltage and amperage as justification for requested service size.
3. One copy of any and all agricultural building permit(s) (if applicable) and or written approval from Planning Services and/or the County Agricultural Commissioner designating agriculture as the primary use on the property.
4. Business plan approved by the Agricultural Commissioner.
5. Completion of this form.

By initialing below, I hereby certify that the following statements are true and correct.

This proposed electric service will be for the agricultural operations described below and as proposed to the Agricultural Commissioner. The requested service will not be used for energizing any equipment or structure(s) not associated with said agricultural operation and/or not depicted on the site plan associated with the permit application number noted below;
This proposed electric service is properly sized for the proposed use and is not oversized for possible future operations or structures not proposed herein; and
I will obtain any and all necessary permits in advance of any modifications or change of use.

Signature line with checkboxes and a 'D' for Denial, followed by a date line.

I, _____ the owner of Assessor's Parcel No. _____, located at _____, declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and I agree to comply with the statements above.
