Please distribute this to the Board of Supervisors and make it part of the public record of the June 9, 2020 board meeting.

Board of Supervisors

I'm looking forward to the day I don't have to address you during public comment about Auburn Trapshooting Club's and the County's disregard for the health, welfare and safety of the North Auburn neighborhood surrounding ATC'S facility.

After 3 years of being blown off, misdirected, told no big deal and there is nothing we can do, I finally got a response to my numerous; complaints, emails, visits to CDRA, phone calls and requests for documents.

Hopfully during staffs investigation, directed by you, into ATC'S historic use the Board has become aware of the numerous complaints against ATC'S business practices.

Have you read the complaints dating back to 2006 submitted on violations covering planning/zoning, code compliance and environmental health issues. Many unanswered including mine

How about the violation document from Placer County Air Pollution and Control District of "Fugitive Dust" from lead removal at ATC'S facility in 2014 done by an out of state contractor with no permit in Placer County or California. Was this dust that permeated homes tested for lead by the county? I was told no big deal when I requested a copy 2 years ago during one of my visits to CDRA.

I understand that enforcement of Zoning Ordinance 17.60.120 A, Nonconforming Uses of Land, especially when it involves, Commercial Shooting Ranges, is problematic and burdensome but to allow county influencers and ATC, this social club not a commercial business, to blatantly and candidly do whatever they want at the cost of the health, welfare and safety of this North Auburn neighborhood is not right.
