

Community Air Protection Incentives Program

Bring Your Ideas for Projects to Improve Air Quality in Kings Beach

Join us for a
VIRTUAL COMMUNITY WORKSHOP
Thursday, September 24, 2020
5 pm to 6 pm

The Placer County Air Pollution Control District, in collaboration with the Tahoe Truckee Unified School District, will host a virtual community workshop that will feature a short presentation on the Community Air Protection (CAP) Incentives Program, air quality, and efforts to reduce localized air pollution in the Tahoe Basin.

Workshop participants are encouraged to share air quality-related community health concerns and provide feedback to help the District prioritize CAP funding among the eligible project categories.

The CAP Incentives Program provides grant funding to projects that implement early actions to achieve emission reductions in excess of those required by regulation. Projects eligible to be considered for funding include:

- **School bus replacements** for public schools (diesel to diesel, diesel to electric)
- Heavy duty **off-road equipment replacements** (small off-road and agricultural fleets only)
- **Electric charging**, CNG or hydrogen fueling stations for private and public entities (residential not eligible)
- **Transit Bus and Garbage Truck Replacements** (diesel to electric)
- **Air filtration systems and electric lawn and garden equipment** in public schools

Virtual Community Workshop

September 24, 2020

5:00 pm to 6:00 pm
