I currently live in Supervisor District #	2 - Weygandt
Map to Find My Supervisor District	Find My Supervisor District

Please visit our [Get Map Files](#) page to view all draft map alternatives, including the public generated maps.

Comment: A few days ago when I looked at the proposed redistricting map, I was disappointed to see my small area of Rocklin (Whitney Ranch/Ranch View), still showing up in District 2. Today I woke up to the pleasant news that after listening to the community, the Hybrid 2.0, Option 1 was tentatively approved that puts citizens of each city together in the same district.

Thank you for listening to your community members!

Dear County Clerk:

I am a resident of Loomis. I ask that the Board of Supervisors throw out Map A and keep cities and rural communities together. Please listen to the residents instead of the politicians. Thank you.

Thank you,
Carri Anderson

“Please don’t lump Loomis Basin with the City of Rocklin on new district maps. Keep Loomis Basin-Granite Bay intact in one district.”

Dear Placer County Supervisors,

I’m writing to ask you to please reconsider approving Alternative A, or the newly proposed alternative, and select a map that reflects what the citizens actually want and the true associations between neighborhoods.

Namely, do not lump Loomis and its informal sphere of influence in the surrounding unincorporated areas with the City of Rocklin. This would completely disenfranchise those of us that would be in this district who live outside Rocklin. The citizens of Rocklin would end up speaking for residents in the Loomis Basin because of the huge population disparity between the two, and the interests and desires of the residents in the two areas are extremely different. Rocklin has grown in size and identity so much that they should now be their own district.

There are clear neighborhood distinctions in these areas that all of us who actually live here feel keenly. The Loomis/GB area includes Loomis, Penryn, Newcastle, parts of Ophir, and South Loomis/Granite Bay east of Sierra College Blvd. and along Auburn-Folsom Road. Voters in the Loomis Basin (the Town, and unincorporated areas) relate with and associate with the residents of the semi-rural Granite Bay area much more and should be lumped with them. Map B2-P1C hybrid most accurately reflects the actual neighborhoods and interests, while also meeting all of the redistricting requirements.

Selecting Alternative A or the newly proposed alternative, neither of which incorporate the public input provided in the public maps, gives the impression that the BOS doesn’t care about and hasn’t considered all of the insight that the public provided through this process. Please reconsider and don’t split up and divide our neighborhoods inappropriately.

Thank you,
R&A Miller
Loomis, Ca.
