# Memo

**To:** All Transit Passengers

**From:** Placer County Transit & Tahoe Truckee Area Regional Transit

**Re:** Nextbus Real-time Predictions

---

Starting Tuesday, February 22, 2022, AT&T began discontinuing its 3G network of services. This change in wireless service has impacted services reliant on this technology, resulting in real-time predictions provided by Nextbus being discontinued until further notice.

Placer County is actively pursuing additional alternatives for real time bus tracking software as well as working with Nextbus regarding supply chain issues impacting the upgrade of equipment.

In the meantime, we would recommend passengers utilize the online bus schedules posted on both the PCT & TART websites as well as google transit. The sites are being monitored to ensure the most accurate schedules are posted.

If passengers have questions they are encouraged to contact the PCT or TART offices for further assistance.
