9am BOS report Tue 13 Sept 2022

Douglas Frank, earlier this year, during the voting machine event hacked any machine, plugged into a wall or not, in 6 minutes max. A \$5 mil. reward was offered (well in advance) for someone to disprove Frank's demonstration.

No legitimate challenger showed up !

Mr. Ryan Ronco, Placer County Recorder and election administrator, made one of his Primary Election campaign stops at the weekly "Freedom Coalition" meeting. We voted and not one of the 70+ attendees wanted to keep the machines; regardless of any excuse or explanation.

During that same meeting, Richard said that Placer County should cancel the machine company contract, recognising the financial consequences. What dollar amount (for legal settlement) would be too expensive; or participate in the false voter result ?

Recently, 70 million French voters, with paper ballots on one specific day (special exemptions allowed), had the formal result in 3 calendar days.

Placer County was one example in the more recent (23 days ago) "The Moment of Truth Summit"; voting machine fraud event, all day August 20 and 21, with 49 States in attendance.

Our recorder spoke (by phone) with Frank on the morning of Thu 25 August.

Same day with paper ballots.

Ladies and Gentleman of the BOS, do not miss this historic opportunity !
