MESSAGE FROM THE SHERIFF

Edward N. Bonner, Sheriff-Coroner-Marshall

There is an old saying, “If you don’t know where you are going, any road will lead you there.”

It is an honor to present the Strategic Plan 2016-2020. This represents a road map for our organization. Our mission is to serve the public. It is imperative that we do this in a professional and thoughtful manner. When planning a trip across country it would be prudent to look at the map, make lodging reservations in advance, as well as ensure adequate funding to complete the trip. As an organization we are moving forward. This document represents that same thoughtful process and goal setting for our big road trip. As with any adventure we will be prepared to deal with the unexpected and sometimes the catastrophic, but we are ready.

I would like to thank Captain Wayne Woo and the members of the Strategic Planning Committee. Their dedicated hours and energy are well demonstrated in the attached document. With this road map and your continued dedication and hard work I look forward to continuing down this path of excellence together.

OFFICE OF THE UNDERSHERIFF

Organizational success is tied to a number of factors including facilities, funding, training, equipment, community support, and most importantly, our people. Also critical to success is the development of a plan that outlines direction, programs, and initiatives for the future.

Management guru Peter Drucker said, “What makes a plan capable of producing results is the commitment of key people to work on specific tasks.” This plan is a living document. It is a flexible framework that can serve as a roadmap to the future; however, for a map to be followed, it must first be codified. Thank you to Captain Wayne Woo and his team for their hard work and dedication in developing a comprehensive document so our most important resource, our people, have sign posts to help guide our progress through 2020.

Devon Bell, Undersheriff

INTRODUCTION

Strategic planning is important for any organization in order to set priorities, provide direction, set a vision, and take a proactive approach to the future. In 2006, the Placer County Sheriff’s Office developed its first strategic plan. Unfortunately, like most of the country, Placer County was soon hit by the recession. There have been many changes within the agency, county, and the law enforcement profession since our last strategic plan.

With the changes in California state laws, the evolving nature and political landscape of the law enforcement profession, and the predicted growth of Placer County, a new strategic plan was a necessary and important piece for the future success of the Sheriff’s Office.

We will utilize this plan while continuing with an organizational philosophy of community oriented policing\(^1\). We will continue to police with the public we serve by creating partnerships and solving problems. This partnership is critical in all of our communities, including the City of Colfax and Township of Loomis.

In order to develop a new plan, a strategic planning committee was assembled consisting of a cross section of the Sheriff’s Office. This committee met several times over the course of three months. The committee started the planning process with an in depth analysis in order to analyze our agency’s strengths, weaknesses, opportunities, and threats (SWOT). Utilizing the SWOT analysis, the committee made additions to the Sheriff’s Office mission statement and core values in order to accurately reflect the culture of the Sheriff’s Office. The SWOT analysis, and the changes to the mission statement and core values, helped the committee identify our strategic areas of emphasis. These areas of emphasis are personnel, community relations, organizational programs, facilities, and technology.

This strategic plan was developed to help guide the Placer County Sheriff’s Office during the next five years. It will help set priorities, provide direction, create vision, and serve as a roadmap to guide the organization into the future.

---

\(^1\) Community policing is a philosophy that promotes organizational strategies that support the systematic use of partnerships and problem-solving techniques to proactively address the immediate conditions that give rise to public safety issues such as crime, social disorder, and fear of crime.
The mission of the Placer County Sheriff’s Office is to maintain the quality of life we enjoy and to ensure our county is a safe place to live, work and visit.

This will be accomplished through safeguarding individual liberties, building community partnerships through transparency and education, preventing crime and resolving those crimes that do occur.

We are also responsible for the professional care and custody of those confined within our jail facilities. Other duties include those of marshal, security of the courts and efficient investigation of coroner cases.

We are committed to this mission and conduct our responsibilities toward a goal of excellence and with dedication to the community we serve.
We will constantly strive to meet the highest standards of honesty and integrity.

We are a family centered organization committed to supporting one another.

We have pride in ourselves and take ownership of our work.

All Sheriff’s Office members will treat each other with dignity, courtesy, and respect, regardless of position or assignment. This leads to identical treatment of the public we serve.

We are involved in our community and seek to become a part of the world we serve.

We will achieve professional performance through continual training, education, and commitment to our duties.

Management and subordinates are mutually accountable for their performance.

There will be no tolerance for criminal misconduct by Sheriff’s Office members, on or off-duty. Such conduct will consistently be presented for legal review.
