

TIP
of the
WEEK

One of the best ways to teach children the alphabet is to familiarize a child with their name. Either write down your child's name in big block letters or make it fun and create their name out of letter blocks. Show your child what each letter of their name is and repeat the letter and the sound it makes. Repeat this often with your child and expand the number of words to include Mom, Dad, and the names of siblings. Favorite words, such as dog, can be included too! This is a great and fun way to teach children more about the alphabet.
