Application for Minor Use Permit
Zoning Ordinance Section 17.56.120
PMPC 20130156 APN 035-151-025-000

Purpose: Sales of Firearms

The Home Business Zoning Ordinance (Zoning Ordinance Section 17.56.120 [Home Occupations]) allows for the sale of firearms as a Home Occupation (Federal Firearms Dealer) provided that a Minor Use Permit is first obtained and that the business will operate in accordance with the performance standards established by the Home Occupation Ordinance, which generally limits such a use to an enclosed living area or other building. In addition to a Minor Use Permit, prior to operating as a Federal Firearms Dealer the permittee must receive approval of a Federal Firearms License from the Bureau of Alcohol, Tobacco & Firearms, a Firearms Dealer Permit from the California Department of Justice, and a Local Firearms Dealer License from the Placer County Sheriff's Office. The purpose of those permits is to ensure that persons licensed to sell firearms have completed background check procedures of those agencies and to register the location of the firearms sales activities for State and local law enforcement agency inspection purposes.

The 2.5 acre project site is developed with a 3,200 square-foot home and a two car detached garage located at the end of a gated private lane. The property perimeter is fenced and the driveway is key-code protected with an entry gate. Parcel delivery trucks gain access to the property via unique access code provided to drivers by the property owner. In the event of a substitute driver, there is a call button located at the gate. Furthermore, the applicant anticipates that the vast majority of parcels/packages will be picked up and dropped off directly at local FedEx and UPS stores. No new construction is proposed to serve the proposed use and all business activities would occur within the existing detached garage. Any test firing of firearms will be done off-site at a supervised range facility.

This applicant anticipates that the majority of sales activities will be conducted on-line from Federal Firearms Dealer (applicant) to Federal Firearms Dealers and to entities of the Federal and State governments with only occasional sales or transfers to individuals or

other licensed dealers. In addition to firearms sales, the applicant would also periodically prepare a small quantity of ammunition for sale or as samples. Bulk ammunition orders will be drop-shipped from a factory or distributor to the customer/buyer.

All business activities will be conducted within the detached garage and there will be no external signs of the home occupation use.

Home Ignition Zone

(The home plus 10 ft distance)

It's the 'little things' that will endanger your home. Just a little ember landing on a little pile of flammable material will burn it. Spend a morning searching out and getting rid of those flammable little things outside and your home will be much safer.

1. Keep your rain gutters and roof clean of all flammable material.
2. Get rid of dry grass, brush and other flammable materials around your home—and don't forget leaves, pine needles and bark walkways. Replace with well maintained (watered) landscape vegetation, green lawn and landscape rocks.
3. Clear all flammable materials from your deck. This includes brooms, stacked wood and easily ignitable patio furniture. Also enclose or board up the area under your deck to keep it from becoming a fuel bed for hot embers.
4. Move woodpiles and garbage cans away from your home. Keep woodpiles away from the home a distance of 2 times the height of the pile—more if lot size allows.
5. Use fine mesh metal screen (1/4" or less) to cover eaves, roof and foundation vents to prevent windblown embers from entering.
6. Inspect and clean your chimney every year. Trim away branches within 10 feet. Install a spark arrester with 1/2" or smaller mesh screen.
7. Got a propane tank? Get rid of any flammable materials within 10 feet of it and, if possible, position it at least 30 feet from any structures.
8. Window screens should be metal, not plastic or other flammable or meltable material.
9. If your home has a pet door, check its seal.

Burning embers landing on wood shake roofs are one of the leading risk factors for losing your home to a wildfire. If possible, replace wood shingle roofs with non-flammable (Class-A) roofing materials, such as asphalt shingles, tile or metal roofing.

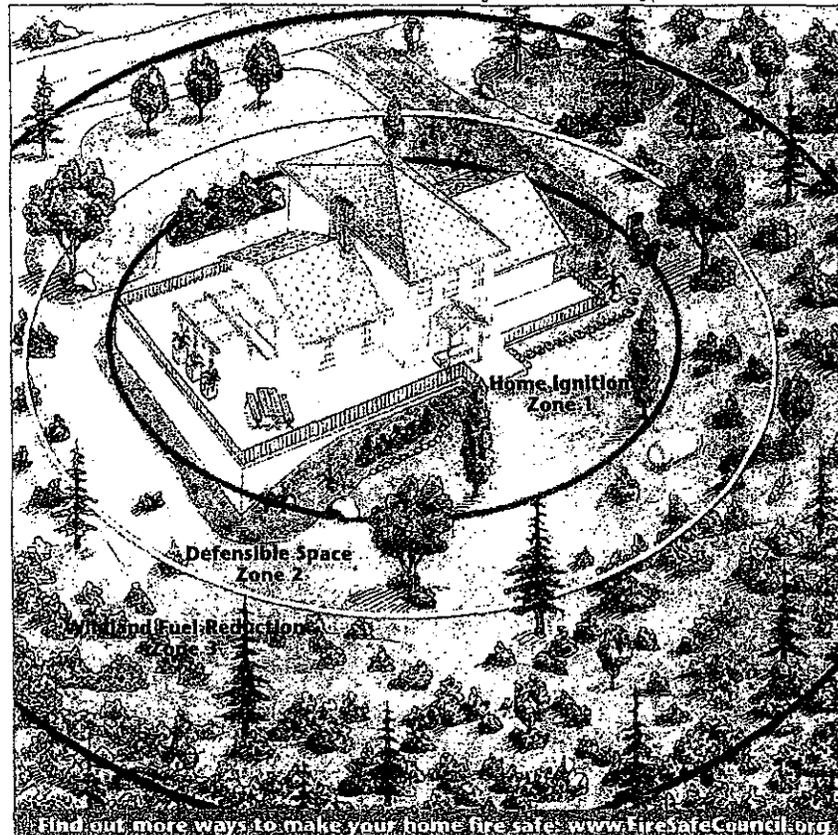

Defensible Space Zone (100 feet or more distance) • Keep this area lean and green!

Your "defensible space" is the area that is a minimum of 100 feet from your home (as required under State Public Resources Code 4291 or other local ordinances). This is the area where you've modified the landscaping to allow your house to survive on its own—greatly improving the odds for firefighters defending your home.

If your home is on a slope or subject to high winds, extend the distance of this zone based upon the "X-Factor." For instance, this zone may increase to 150 feet (1.5 X 100 feet).

Create a Defensible Space Zone by keeping in mind the three R's of defensible spaces:

- Remove—dead and dying grass, shrubs and trees.
- Reduce—the density of vegetation (fuel) and ladder fuels, those fuels extending from the ground to the tree canopies.
- Replace—hazardous vegetation with less flammable, irrigated landscape vegetation including lawn, or other low growing groundcovers and flowering plants.

Wildland Fuel Reduction Zone

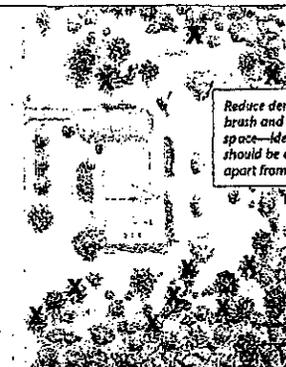

(Beyond 100 feet distance)

Getting rid of the undergrowth and thinning out densely-crowded smaller trees in this outlying area will reduce fire intensity and slow the spread of a fire moving toward your home. Defensible space increases the odds of your home's survival.

Experts recommend a minimum of 10 feet of spacing between individual trees and shrubs, measured at the crown (widest part) of the tree or shrub. You may need to increase this distance based on your property's X-Factor.

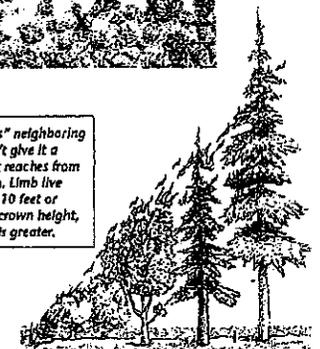

Mature trees should also be limbed up 10 feet, or 1/3 of their live crown height, whichever is greater.

It's possible, depending upon the size of your property, that you will be limited by your property boundary and unable to complete the fire safe measures identified in Zones 2 and 3. If this happens, talk with your neighbors and ask for their cooperation. A safer home means a safer neighborhood for everyone.

Reduce density by giving brush and shrubs more space—ideally they should be about 10 feet apart from one another.

Fire "climbs" neighboring trees—don't give it a ladder that reaches from low to high. Limb live trees up to 10 feet or 1/3 of live crown height, whichever is greater.
