

# Grant Program Now Open !

The Placer County Air Pollution Control District is seeking applications for their annual Carl Moyer Program for projects that reduce air pollution. This program is primarily designed to reduce nitrogen oxides (NOx), Reactive organic gases (ROG's), and particulate matter (PM) emissions.

## Grant project categories include:

- 1) Heavy duty diesel on and off-road equipment replacements and repowers
- 2) School bus replacements
- 2) Alternative fuel infrastructure (electric, CNG, hydrogen)
- 3) Agricultural pump repowers and electrification

This is a competitive grant program and cost effectivity will be critical in determining project funding. All projects selected for funding must operate at least 75% of the time within Placer County. Approximately \$1.2 million is available for grants this year. Visit [www.placerair.org](http://www.placerair.org) for more detailed information, eligibility requirements, and grant applications.

Application Solicitation/Submission Period begins:

June 1, 2018

# Apply for a Grant Today

## Grant possibilities include:

- Diesel to electric school bus conversions
- Electric ag. pump electrification plus infrastructure
- Diesel to CNG truck replacement
- Electric charging stations for transit buses
